

LILIT MANUKYAN

Analytics Engineer

lilitmanukyan09@gmail.com | +374 44253545 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Analytics Engineer with 7+ years across data and analytics, specializing in building the transformation layer that makes business data reliable and usable. I work where engineering meets analytics — combining deep pipeline experience (Matillion, dbt, SQL, Python) with a strong BI foundation (Power BI, Power Automate) to deliver data assets that both engineers and business stakeholders trust.

WORK EXPERIENCE

Data Integration Engineer

Philip Morris International

Aug 2023 – Present

- Designed, developed, and maintained 100+ production-grade ETL/ELT pipelines in Matillion targeting a 55TB Snowflake database, powering 10+ data products across the business
- Acted as the technical bridge between data engineering and analytics teams, translating business requirements into scalable pipeline architecture
- Owned data quality monitoring for a defined business domain — tracking business logic validation failures, raising bugs, and driving resolution to maintain data reliability for downstream consumers
- Automated 5 recurring reporting workflows using Power Automate, saving approximately 30 hours of manual effort monthly and delivering scheduled reports directly to business stakeholders
- Conducted peer reviews of data integration pipelines to enforce engineering standards, performance optimization, and reliability across the team

Data Analyst

Philip Morris International

Jan 2022 – Aug 2023

- Designed and maintained 10+ Power BI dashboards with advanced DAX logic and data modeling, directly embedded in management reporting and strategic decision-making workflows
- Designed and integrated new data assets into the existing data architecture, improving reporting efficiency and data accessibility across analytics teams
- Executed end-to-end analytical workflows including data extraction, cleansing, aggregation, and analysis of large structured and unstructured datasets
- Led data quality testing initiatives, establishing validation procedures and resolving upstream data issues to ensure reporting accuracy

Customer Analytics Specialist

Digitain

Jan 2021 – Jan 2022

- Analyzed multi-million record customer datasets to develop behavioral segmentation models informing CRM targeting and audience strategy
- Built management-facing dashboards surfacing actionable behavioral insights for leadership decision-making
- Evaluated and optimized CRM marketing performance metrics, identifying opportunities that improved campaign effectiveness

Investment Analyst

Converse Bank

Oct 2018 – Oct 2020

- Built financial models, valuations, and investment reports for the Investment Committee
- Conducted financial and market analysis supporting strategic investment decisions

TECHNICAL SKILLS

Pipeline & ETL: Matillion, dbt, Power Automate, ETL/ELT Design

Data Warehouse: Snowflake, Data Modeling, Data Quality Frameworks

Programming: SQL (Advanced), Python (Pandas, NumPy)

Cloud: AWS

BI & Visualization: Power BI, DAX

Version Control: Git, GitHub, Bitbucket

CERTIFICATIONS

- SnowPro Core Certification — Snowflake, Apr 2024
- AWS Certified Cloud Practitioner — Amazon Web Services, Aug 2024
- Microsoft Certified: Power BI Data Analyst Associate — Microsoft, Apr 2022
- Data Engineering — Armenian Code Academy, Jan 2022
- Financial Modeling & Valuation Analyst — Corporate Finance Institute, Apr 2020

EDUCATION

MS in Strategic Management — American University of Armenia *2017 – 2019*

BA in International Economic Relations — Armenian State University of Economics *2013 – 2017*

ADDITIONAL

Former Data Analytics Tutor, Armenian Code Academy — designed and delivered 2 in-person training programs in SQL and Power BI for 40+ students

Languages: English (Full Professional), Armenian (Native), Russian (Working), French (Working)
